IEEE INTERNATIONAL CONVENTION - CALL FOR PAPERS

The Groups and TOC Technical Committees have been asked to participate directly in the planning of the International Convention to be held March 22-25, 1965 in New York. Dr. Emmanuel P. Papadaki of Bell Telephone Labs., Inc., Allentown, Pennsylvania will represent the G-SU on the Technical Program Committee and will organize the ultrasonics portion of the program.

1965 Ultrasonics Symposium

Chairman Robert L. Rod has announced detailed plans for the 1965 Symposium to be held at the Miramar Hotel in Santa Monica, Calif. October 14, 15, 16 and 17. The Technical Program Committee, with Dr. Allen H. Meitzler as Chairman, has organized a program of 11 technical sessions occupying Wednesday through Friday. The program includes 18 invited papers and 33 contributed papers covering a wide range of topics including medical ultrasonics, ultrasonic delay lines, the application of ultrasonics to internal friction studies, phonon interactions, industrial ultrasonics and ultrasonic amplification. Response to this meeting has been so large that both an evening session and parallel sessions have been required to accommodate the large number of high quality papers. A preliminary program, complete with abstracts, is being mailed to all members under separate cover.

The social hour and banquet are scheduled for Thursday evening at the Miramar Hotel. Tours to Marineland and Disneyland are planned for Saturday.

The technical sessions will be open to all with the payment of the registration fee of $10 for three days, or $4 for individual days.

Tickets for the banquet will be on sale at the registration desk until the close of the Wednesday afternoon technical sessions.

Requests for additional information should be addressed to the General Chairman, Robert L. Rod, Acoustica Associates, Inc., 5331 West 104th Street, Los Angeles, California, 90045.

Group is the Same, Only the Name Has been Changed

If you have not been watching carefully, you may be wondering what happened to the PGUE. As a result of the merger of IRE and AIEE, several groups became Professional Technical Groups, and so we have PTGUE. As noted in the last Newsletter, PTGUE was replaced by the AdCom to Professional Technical Group on Sonics & Ultrasonics in order to better describe the field of interest. The IEEE has decided to drop the term Professional Technical Group from the simple title, Group on Sonics and Ultrasonics, or G-SU.
A NEW CONSTITUTION

Our Group is operating under a constitution that differs in form and in spirit from the model recommended at present by IEEE. The Institute now favors a brief constitution that only establishes a framework and is difficult to amend, plus extensive bylaws that spell out the methods of operating and that are easy to alter. This principle permits a Group to respond rapidly to changes in the environment in which it functions.

During the past few years, it has become apparent that under a constitution of the modern type, the affairs of the Group could be managed better. The AdCom has therefore drafted a new constitution, which has been approved by the Executive Committee of the IEEE and is now submitted to the membership for ratification. Its overall effects will be (1) to give to the AdCom more discretion in its operations; subject always to correction if the administration is unsatisfactory to the members; (2) to enable ex-officio members to have a larger voice in AdCom decisions, by allowing them to vote. The second point is important, because the experience of recent years has been that the ex-officio members are more active workers than many of the elected members. The reason is, of course, that the ex-officio members are appointed by the Chairman to do or to manage the actual labor of operating the Group, and the Chairman appoints only those that he believes are willing to work; if he finds he has guessed wrong, he makes a new appointment. It seems to me proper that those who do the work should have a voice in the determination of policies.

Absenteeism on the part of elected members has at various times in the past been a serious problem. One could say that no man should stand for election to the AdCom unless he is willing to attend the meetings regularly. However, there are men who represent technical areas or geographical areas or special talents in such a way as to be well worth having on the committee, even though their other responsibilities are so heavy that they cannot attend every meeting. The proposed constitution ensures that at every meeting of the AdCom there will be a vigorous circle of voters, and also that the elected members of the committee can, as now, represent a broad spectrum of interests. Note that the new constitution contains a provision to ensure that the elected members of the AdCom always outnumber the appointed members. The wheel therefore remains firmly in the hands of the Group membership; what the new constitution offers is power steering.
