Nat'l Convention Program:	John E. May, Jr.
Nat'l Convention Record:	C. M. Harris

(over)

In view of the rapid growth of our Group, it seems desirable to review the method by which our officers are elected and to consider methods in which the general membership would participate more actively in the selection of their officials. Therefore, I have appointed Dr. Morton D. Fagen, a past Chairman of the Professional Group, to investigate this problem and to come up with some definite recommendations. Any PGUE members having suggestions in this regard should send them to him at the Bell Telephone Laboratories, Whippany, New Jersey.

It is hoped that we will have enough papers to have a PGUE sponsored session on ultrasonics at the National Electronics Conference in Chicago in October. We have already begun plans for the March, 1958 IRE meeting in New York City. Specifically, we are planning to have two sessions on ultrasonic measurements, one of these being devoted to ultrasonic delay lines. Dr. John E. May, Jr., Bell Telephone Laboratories, Whippany, New Jersey, will be the Program Chairman. Please communicate with him if you plan to present a paper on ultrasonic measurements or on any other aspect of ultrasonics.
