

Guidelines for Authors

(Updated October 14, 2019)

The *IEEE Transactions on Ultrasonics, Ferroelectrics, and Frequency Control* (T-UFFC) accepts manuscript submissions of **Papers**, **Review Papers**, and **Letters**. To qualify for publication, the submissions must be unpublished, specifically prepared for the IEEE T-UFFC, and not be under consideration elsewhere (see *Ethics*). It is the responsibility of the corresponding author to obtain consent from all co-authors and sponsors before submission. By submission, authors agree to pay all charges and fees associated with publication of the manuscript (see *Charges and Costs*).

Every submitted manuscript must:

- 1) provide a clear statement of the problem and the proposed solution;
- 2) clearly explain the significance and the impact of the contribution to the relevant research field;
- 3) state the novelty and distinction of the current manuscript relative to previously published studies; and
- 4) provide relevant and recent citations from the most closely related work in the field to put the contribution in context.

Scope: The scope of interest of the IEEE Ultrasonics, Ferroelectrics, and Frequency Control Society includes the theory, technology, materials, and applications relating to: 1) the generation, transmission, and detection of ultrasonic waves and related phenomena; 2) medical ultrasound, including hyperthermia, bioeffects, tissue characterization and imaging; 3) ferroelectric, piezoelectric, and piezomagnetic materials, including crystals, polycrystalline solids, films, polymers, and composites; and 4) frequency control, timing and time distribution, including crystal oscillators and other means of classical frequency control, and atomic, molecular, and laser frequency control standards. Areas of interest range from fundamental studies to the design and/or applications of devices and systems.

The articles in this journal are peer reviewed in accordance with the requirements set forth in the [IEEE PSPB Operations Manual](#) (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-blind peer review process, where the identities of the reviewers are not known to the authors, but the reviewers know the identities of the authors. Articles will be screened for plagiarism before acceptance. Corresponding authors from low-income countries are eligible for [waived or reduced open access APCs](#).

Prescreening: All manuscripts submitted to IEEE T-UFFC are prescreened immediately after they are submitted and before they are transmitted to reviewers for evaluation [explained in Section 8.2 of the IEEE Publication Services and Products Board (PSPB) Operation Manual]. Manuscripts with limited novelty, insufficient technical content, and poor language will be receive an administrative decision of **Immediate Reject** without being considered for review. Manuscripts must be

prepared carefully and written in a clear and concise style in English within the scope of the journal and represent a novel contribution.

I. TYPES OF SUBMISSIONS

Papers are original research findings with a complete disclosure of the techniques and methods for reproducibility. Papers may be of any length and must generally satisfy requirements for completeness. However, any paper in excess of **8** pages (including title, names of authors, abstract, text, figures, tables, appendices, references and authors' biographies) will be subject to mandatory overlength page charges. Papers may include Special Issue Papers and Invited Papers, which may have different page limits. Authors considering submitting a 2-part manuscript should first discuss the proposal with the Editor-in-Chief. Experience has shown that it is difficult to find suitable reviewers for the 2-part manuscripts and often the reviewers render a decision to combine manuscripts.

Review Papers are not original research but a coherent collection/accumulation of methods, results, and/or conclusions from different publications on a particular topic with appropriate references to the original research. Review articles can contain figures that have been published elsewhere with permission to reproduce or adapt them for publication. Review articles must include the word "review" in the title. It is the authors' responsibility to obtain such permission from the copyright holder before the submission of the manuscript and forward it to the Editor-In-Chief. Review papers submitted to the IEEE T-UFFC in excess of **12** pages will be subject to mandatory overlength page charges. Review papers may include Special Issue Review papers.

Letters are short, rapid communications for which timeliness is essential. Letters will be reviewed only for acceptance or rejection to speed up the process. Published letters must occupy no more than **3** pages excluding references

Errata provide a forum for authors to make corrections to their papers published previously in the IEEE T-UFFC.

II. MANUSCRIPT PREPARATION

Authors should prepare their article, graphics, and multimedia materials according to IEEE guidelines listed in the [IEEE Author Center](#). Authors publishing for the first time with the IEEE can refer to [How to Write for Technical Periodicals](#) from the IEEE Authorship Series while preparing their manuscript.

Manuscript Formatting & Article Templates: The IEEE T-UFFC stipulates a PDF submission of the manuscript with formatting the same as the published articles in Transactions. This assists reviewers and facilitates *Preprinting* (pre-edit Rapid Posting). Prepare your manuscript according to the article templates in the [IEEE Author Center](#) in double-column and single spaced format with in-line figures. Instructions for manuscript preparation, document templates for Microsoft

Word, and style files for LaTeX users can be found at http://www.ieee.org/publications_standards/publications/authors/author_templates.html

Abstract: The abstract must be a concise yet comprehensive reflection of what is in your article. In particular:

- The abstract must be self-contained, without abbreviations, footnotes, or references.
- The abstract must be between 150 and 250 words.
- The abstract must be written as one paragraph, and should not contain displayed mathematical equations or tabular material.
- The abstract should include three or four different keywords or phrases, as this will help readers to find it. It is important to avoid over-repetition of such phrases because this can result in a page being rejected by search engines.
- Ensure that your abstract reads well and is grammatically correct.

Extensions of the Authors' Prior Work: It is not acceptable to republish your prior work, including journal articles and conference papers. Authors may use conference papers as the basis for a fully developed journal submission, but the new manuscript should clearly specify the novelty of the contribution when citing the prior work. All articles published in IEEE T-UFC must contain substantial additional technical material with respect to the conference article or articles of which they represent an evolution. Per IEEE Policies, Section 6.4, "IEEE's technical publications shall include original material which appears only once in the archival literature. Unusual circumstances may allow for exceptions to this policy." The appropriate procedures to be followed are specified in the IEEE Publication Services and Products Board (PSPB) Operation Manual, Section 8.1

English Language Editing Services: English language editing services can help refine the language of your article and reduce the risk of rejection without review. IEEE authors are eligible for discounts at several language editing services; visit the [IEEE Author Center](#) to learn more. Please note these services are fee-based and do not guarantee acceptance.

III. SUBMISSION VIA MANUSCRIPT CENTRAL

Manuscripts are accepted electronically only through ScholarOne Manuscript Central (MC) at <http://mc.manuscriptcentral.com/tuffc-ieee>.

ScholarOne MC Account: Before creating an account on ScholarOne MC, please check whether you already have an existing account based on your e-mail address. An account may have been created for you if you previously reviewed or co-authored a paper. Please refer to the [Manuscript Central Author Guide](#) for more information on ScholarOne MC.

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. ORCID is a persistent unique identifier for researchers and functions similarly to an article's Digital Object Identifier (DOI). ORCIDs enable accurate attribution and improved discoverability of an author's published work. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.

File Upload: Upload your double-column PDF document as the **Main Body** after verifying it with the "IEEE PDF

Checker" on the [IEEE Author Center](#) Web page. Please upload your Word document or LaTeX and BIB files for post-production as **Supporting Documents**. If any of the items from the reference list are not publicly available, a PDF version of the document should be uploaded as a **Supporting Document**. High-resolution images should be uploaded for post-production as **Supporting Documents** after verifying them with the "Graphics Checker Tool" on the [IEEE Author Center](#) Web page.

Graphical Abstract (Optional): In addition to written abstracts, papers may include graphical abstracts to provide a visual summary of their findings by means of an image, animation, video, or audio clip. "Instructions for Developing a Graphical Abstract for your Article" can be found on the [IEEE Author Center](#) Web page. The graphical abstract is considered a part of the technical content of the paper, and you must provide it for peer review during the initial submission process. Files for graphical abstract should be uploaded as **Multimedia** on ScholarOne MC.

Multimedia Materials (Optional): Multimedia files (such as audio and video clips), datasets, and software code can be published on IEEE Xplore. Authors should provide a README file (in ASCII or PDF format) with the multimedia material. "Instructions for the Preparation of Multimedia Materials" can be found on the [IEEE Author Center](#) Web page. Multimedia material and the README file should be uploaded as **Multimedia** on ScholarOne MC.

Author Names in Native Language (Optional): IEEE supports the publication of author names in the native language alongside the English versions of the names in the author list of an article. "Instructions for Submitting Author Names in Native Languages" can be found on the [IEEE Author Center](#) Web page.

Submission: Proofread your manuscript before submission and confirm that all figures and equations are visible. Proofreading is critical; once you submit your manuscript, the manuscript cannot be changed in any way. A successful submission will be followed by an e-mail confirmation to the corresponding and all contributing authors.

IV. ETHICS

It is the responsibility of authors to obtain all necessary approval and to follow ethics when treating human subjects and animals. A footnote or an acknowledgement should appear in the manuscript to indicate such approval. Authors must also disclose all funding bodies and all forms of financial and equipment support that contributed to the submitted manuscript. By submitting a manuscript, all authors confirm that the work is original; figures, tables, and reported results are original contributions and accurately reflect the experimental work. It is unethical for authors to submit manuscripts which overlap substantially in language or technical contribution to multiple journals simultaneously for review. All forms of author misconduct are strictly prohibited and punishments are listed in Section 8.2 of the IEEE Publication Services and Products Board (PSPB) Operation Manual; author misconduct includes, but is not limited to, "misrepresenting data, plagiarizing text, or not informing the editor that an article

had been published, accepted for publication, or concurrently under review by another publication.”

V. AFTER THE REVIEW

Manuscripts submitted to the IEEE T-UFFC will receive one of the following decisions after the review process.

Accept: No further review is necessary. Manuscripts may still have minor corrections or changes according to reviews or editor’s decision.

Minor Revisions: Manuscripts may be returned to the authors for revision in response to reviewers’ recommendations. The corresponding author must submit a PDF of the revised manuscript using the **Main Body** file type with all changes highlighted in yellow within three weeks to ScholarOne MC. To facilitate *Pre-printing* (Pre-edit Rapid Posting) ensure a clean PDF version of the manuscript is uploaded within the **Supporting Document**. A “Response to Decision Letter” must be submitted, including a point-by-point response to reviewers’ comments explaining all changes made in the manuscript. Revised manuscripts are subject to the review process.

Reject With Recommendation For Resubmission: This decision indicates that the manuscript requires a major change that cannot be performed within three weeks. Authors may resubmit a revised manuscript **only once**, indicating that it is a resubmission of an earlier rejected manuscript in ScholarOne MC. Authors are expected to submit supporting documents identifying the details of the changes made to the resubmitted manuscript and address all of the reviewers’ comments. Resubmissions without identification of the previously rejected manuscript or without documentation of the changes will be immediately rejected. Resubmitted manuscripts are subject to the review process.

Submit to Another Journal: The submitted manuscript is not relevant or within the scope of the IEEE T-UFFC. The Associate Editor or reviewers may recommend another journal.

Reject: No further considerations.

VI. SUBMISSION OF FILES FOR PRODUCTION

A copyright form and biographies should be sent to the publisher before publication if they were not submitted with your manuscript.

Copyright and Consent Form: It is the policy of the IEEE to own the copyright to the technical contributions it publishes. To comply with IEEE copyright policy, authors are required to sign an “IEEE Copyright and Consent Form” and submit it with the manuscript. An e-copyright form may be uploaded to ScholarOne MC as **Supporting Document** during submission or emailed to the publisher. The copyright form can be downloaded from http://www.ieee.org/publications_standards/publications/rights/ieecopyrightform.pdf

Author Photos and Biography: Photos and biographies are required for Papers and Review Papers. Authors should submit their biographies and recent photographs via ScholarOne MC as **Supporting Documents** or email them to the publisher. A suggested biography format consists of three paragraphs: 1) name, where and when born, degrees earned, field(s) of study, school, city, and state; 2) chief employment dates, organizations, positions held, type of work, responsibilities,

and present position; and 3) professional society membership, offices, and awards. The biography should be submitted as a separate ASCII text or word processing file. A 1.5 in × 2 in photo with 300 ppi at 8-bit pixel depth will have sufficient resolution for publication.

When the article is ready for the publication, an e-mail will be sent to you explaining the author proof process and publication charges. You should respond within three working days of receiving the email to avoid delaying the publication process.

The following forms will be mailed with your proof. You should respond within three working days of receiving your proof to avoid delaying the publication process.

Publication Charge Form: Authors should complete the section on Open Access fees, voluntary page charges, and mandatory overlength page charges on the publication charge form. If wire transfer is selected as the payment method, be sure to provide an e-mail address for receipt, as the details will be sent to that address.

Author Proof: The corresponding author must log in to the [IEEE Author Gateway](#) and download the proof of their manuscript. Once the author has reviewed the proof and made necessary changes, the updated version must be uploaded for publication. Please note that your proof may be uploaded only once. Only minor editorial changes can be done on the article. Any technical changes or addition of new references must be approved by the Editor-in-Chief.

VII. CHARGES AND COSTS

IEEE Open Access Charges: The IEEE T-UFFC is a hybrid journal that publishes both traditional subscription-based content as well as open access (author-pays) content. After the manuscript is accepted for publication, the authors must pay the \$2,045 Open Access fee to enable unrestricted public access. Open Access charges are billed separately from the other applicable charges below. No Open Access payment is required for traditional submission, which will be only available to IEEE Xplore subscribers. More information about IEEE Open Access is available on: http://www.ieee.org/publications_standards/publications/authors/open_access.html

Voluntary Page Charges: After a manuscript has been accepted for publication, the authors or the authors’ company or institution will be requested to pay a charge of \$115.50 per page to cover part of the cost of publication for the number of pages that comprise the standard length. Payment of voluntary page is not a prerequisite for publication.

Mandatory Page Charges: Mandatory page charges of \$175 per page are required for contributions longer than the predetermined page limit (see *Types of Submissions*). The authors agree to pay these charges simply by submitting their manuscript to the IEEE T-UFFC. The publisher holds the right to withhold publication of the current submission or any future submissions from the authors who have not paid the outstanding mandatory page charge. Only the Editor-In-Chief can waive the mandatory overlength page charge under extenuating circumstances.

Color Charges: All figures will be published in color free of charge in the electronic version on IEEE Xplore.
